SMART WATER

Work with your Safer Neighbourhoods Team

Smart Water is a colourless forensic fluid containing millions of microscopic particles that make up an individual property identification code that is simply dabbed onto the uneven surfaces of your valuables. It can be used to code all sorts of items such as jewellery, ornaments, electrical items and even your motor vehicle. Each bottle contains a unique chemical 'code' which is registered to you – conclusively proving ownership. It cannot be easily seen by the naked eye and is almost impossible to remove. The liquid glows under ultraviolet light making it easy for the Police to detect.

The Police use it in undercover operations to catch and convict criminals. Criminals know about Smart Water and fear its power to forensically link them with the scene of a crime. So, by coding your valuables and displaying the Smart Water deterrent signs, you are sending out a powerful warning to any thieves and burglars operating in your area.

Smart water when dry is non-hazardous and virtually impossible to remove completely. It is not easily detectable under normal lighting conditions however it does glow under Ultraviolet light.

Smart Water is not readily available in the borough of Hillingdon, it is supplied to priority areas where there have been a high percentage of burglaries being committed. However there is a substitute pen available that works exactly the same way as Smart water however it's not a bar-coded liquid and is a ultraviolet pen. To find out more contact your local Safer neighbourhood team for more information.
